SUMMARY

I build LLM and multi-agent systems that do real work and stay under control. Three live systems, open source, at brandon-s-engineer.com.

EXPERIENCE

AI Engineer — Resale Intelligence (own product) 2026 – Present

- Tracked 16,000+ electronics listings by building a Chrome extension, ingest API and Postgres pipeline.
- Scored deals in under 5 s and $0.001 each by orchestrating 4 LLM agents (spec, market, risk, lead).
- Set max-buy prices in code and SQL, with guardrails that overrule any LLM verdict contradicting them.

Freelance Full-stack Developer 2024 – Present

- Built a car sales site and AI CRM for a dealership advisor (https://cars-lac-omega.vercel.app): a Chrome extension syncs 8 inventory sheets and an LLM chat with tool calling answers stock questions.

AI SYSTEMS

Answer agent Next.js · OpenAI · pgvector

- Answers customers from policies and live orders. RAG plus safe SQL tools; every answer cites its source.

Lead agent Python · LangGraph · Pydantic · MCP

- Qualifies leads and prepares CRM updates, then waits for a human to approve before acting.

SKILLS

AI	LLMs, multi-agent systems, OpenAI, RAG, LangGraph, Pydantic, MCP, n8n, tool calling, structured outputs
Web	TypeScript, React, Next.js, Node.js, Tailwind
Back-end	Python, FastAPI, PostgreSQL, Prisma, MongoDB, Stripe
Cloud	Vercel, Render, AWS (S3, Cognito, Lambda), Docker

LANGUAGES & EDUCATION

Languages	Spanish (native), English C1
Education	Self-taught software and AI engineering
